

Alain Poitevin

Data Quality Lead - Business/IT Liaison

Etterbeek, Brussels Region, Belgium | poiteal@gmail.com | [+32 491 25 65 26](tel:+32491256526) | linkedin.com/in/poiteal

Professional Profile

Data Quality Lead and senior technical professional with extensive experience in European Commission consulting environments. Combines data-quality coordination with a background in BI, Oracle data systems, Qlik Sense Enterprise administration, reporting platforms, and application delivery, translating business concerns into tracked remediation work across organisational boundaries.

Core Competencies

Data quality controls and remediation follow-up | Cross-team remediation coordination | Business and functional analysis | Oracle SQL and PL/SQL | Qlik Sense Enterprise administration | Python and automated reporting systems | BI platforms and data modelling | Jira, Kanban, Agile, and Scrum | Incident follow-up and Level 3 support | European Commission delivery environments

Professional Experience

Data Quality Lead | ARHS Developments

Aug 2025 - Present

Client context: European Commission

- Coordinate data-quality efforts at the European Commission.
- Act as the coordination point between business stakeholders and the data analyst team.
- Coordinate control follow-up and remediation tracking.
- Structure analyst work through Jira and Kanban.
- Maintain and use automated control reports.
- Translate business concerns into actionable remediation work.
- Escalate issues requiring IT or platform input and follow them across organisational boundaries.
- Build AI-assisted tooling and automation for data-quality work, working with both commercial AI assistants and on-premises/local AI deployments.

Technical environment: Data quality controls | Jira | Kanban | Automated reporting | AI-assisted development | On-premises/local AI tools
