

Alain Poitevin

Data Quality Lead - Business/IT Liaison

Etterbeek, Brussels Region, Belgium | poiteal@gmail.com | [+32 491 25 65 26](tel:+32491256526) | linkedin.com/in/poiteal

Professional Profile

Data Quality Lead with a 25+ year technical career spanning business intelligence, data platforms, application development, and European Commission environments. Coordinates data-quality remediation across business stakeholders, analysts, and platform teams, supported by hands-on experience with Oracle, Qlik Sense Enterprise, Python, and reporting systems.

Core Competencies

Data quality controls and remediation tracking | Business-IT liaison | Analyst workflow coordination | Oracle SQL and PL/SQL | Qlik Sense Enterprise | Python | BI and automated reporting | Jira and Kanban

Professional Experience

Data Quality Lead | ARHS Developments

Aug 2025 - Present

Client context: European Commission

- Coordinate data-quality efforts at the European Commission.
- Act as the coordination point between business stakeholders and the data analyst team.
- Coordinate control follow-up and remediation tracking.
- Structure analyst work through Jira and Kanban.
- Maintain and use automated control reports.
- Translate business concerns into actionable remediation work.
- Escalate issues requiring IT or platform input and follow them across organisational boundaries.
- Build AI-assisted tooling and automation for data-quality work, working with both commercial AI assistants and on-premises/local AI deployments.

Technical environment: Data quality controls | Jira | Kanban | Automated reporting | AI-assisted development | On-premises/local AI tools

Lead System Administrator / Qlik Sense Enterprise Administrator | ARHS Developments

Dec 2021 - Aug 2025

Client context: European Commission RTD

- Administered Qlik Sense Enterprise services for RTD data and reporting platforms.
- Maintained platform continuity and service reliability.
- Followed incidents and provided Level 3 support for the RTD eGrants dataset.
- Contributed technical analysis across Oracle, Python, Qlik Sense, PHP/Symfony, and legacy systems.
- Coordinated operational, business, and development teams during cross-stack diagnosis.

Technical environment: Qlik Sense Enterprise | Oracle SQL/PLSQL | Windows platforms | BI/reporting | Python | PHP/Symfony | VMware

Professional Experience (continued)

Business Intelligence Analyst / Qlik Sense Developer | UniSystems

Aug 2018 - Dec 2021

- Performed functional and business analysis.
- Produced reporting with Qlik, SAS, and BusinessObjects.
- Maintained and administered Qlik Sense servers and developed Qlik Sense applications.
- Modelled data with Enterprise Architect.
- Developed ETL workflows with SAS Data Integration Studio.
- Developed PL/SQL and implemented data-quality controls.

Technical environment: Qlik Sense | SAS | BusinessObjects | Enterprise Architect | SAS Data Integration Studio | PL/SQL | Windows | VMware

Business Intelligence Analyst | ARHS Developments

Jul 2017 - Aug 2018

Client context: European Commission RTD / Research and Innovation

- Performed business-intelligence analysis for ARHS in the European Commission RTD / Research and Innovation context.

Technical environment: Oracle | Enterprise Architect

Earlier Career

Earlier career (2000-2017): analyst, developer, technical writer, and web-development roles for European Commission and consulting environments, including Engineering Ingegneria Informatica, Unisys Consulting, re.media, Getronics / European Commission, and Onpoi.

Technical Skills
